Dr. Joshua Lederberg
Department of Genetics
University of Wisconsin
Madison, Wis.

Dear Lederberg:

I enclose reprints of the work that we did on Micrococcus antibiotics. We have not done any further work on them and these papers summarize most of what we have observed. It is rather sketchy; the usual situation when dealing with unstable products or with products insoluble in anything but water. Some of the characteristics resemble active materials from coliforms studied by the Oxford "group" but I do not think that we could relate them.

We look forward to seeing you at Boston.

Yours sincerely

A handwritten signature in dark ink, appearing to read 'R. G. E. Murray'.

R. G. E. MURRAY, M.D.
